## Jump into Summer

"Where are we going tonight?" That's the idea behind using fragrance in your Softub! When you smell certain scents, it brings back not only an instant memory of what the smell is, but also of the emotions you felt at the time. Smell doesn't just influence our moods. It has a direct influence on our feelings. For me, it's Lilac! I remember the lilac tree I used to climb up in as a child. It's calming and relaxing. Other scents have been proven as beneficial such as Vanilla as a relaxant, Lemon as a mental stimulant, and Eucalyptus to clear coughs, colds, and muscle tension.

So, where are you going tonight?  
Off to a Tropical Island?  
Watching a Hawaiian Sunset?  
Or a walk in the Rain?

Check out our great selection and start vacationing tonight!

Amy Lines

## Tips for your tub

I once heard, "When you make it easy, you are giving your clients a gift—the gift of time."

Being a business owner, wife, mother of two, and countless other titles, I understand the gift of time. I'm an avid Softub bather! When Ted and I purchased our first Softub in 1992, the Dealer dropped it off and was never seen or heard of again! When we started our Dealership, the first thing we wanted to stress was client services. That's why we've created a "cheat sheet", a website, a newsletter, and reminder postcards! We are here for you! We're not just selling a bucket of chlorine, we're selling clean water! The Softcare/ Easycare line of products is not a gimmick to get your product business. It really is the ONLY products safe for your Softub. I KNOW. Remember, I was left out to dry in the beginning....not you! I've learned the hard way that you really need to use Softub products ONLY and use them CORRECTLY! This guarantees your warranty and many, many years of Softub enjoyment. We can walk you through any questions and concerns you may have regarding water treatment, so don't hesitate to call or email.

PERFECTION IS OUR GOAL.  
EXCELLENCE WILL BE TOLERATED.
